

Registration Boardroom

Openstage XML application

Open source technology Application is completely built with open source technology as Java, JavaScript, GlassFish server and MySQL database engine.

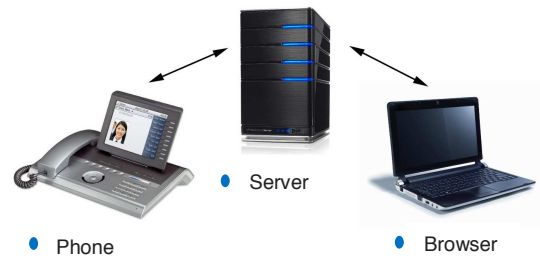

JavaScript

- Simple and quick way to find free room for your conference.
- Clean overview and administration of all rooms and reservations.
- Intuitive and easy navigation.
- OpenStage 60/80 compatibility.

The Registration Boardroom application is a simple but powerful solution for managing room reservations in the environment of your company.

Designed with the priority of speed and maximum usability the Registration Boardroom application is flexible enough to be used in any office space. The simple intuitive navigation of OpenStage VoIP telephone devices is ready to be used by any of your employees without training.

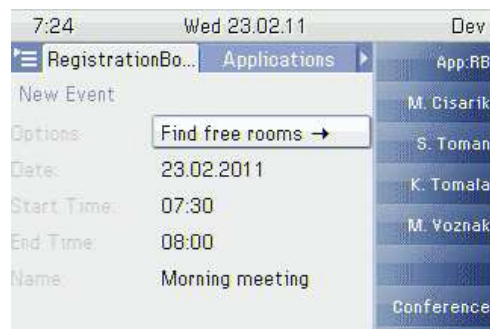

For the complex administration of your rooms and all the events we have created an architecture of two

way communication so you can access the application from the OpenStage device as well as through your favorite internet browser. Print an overview of reservations for any of your rooms in a clean table, or simply add, remove and edit any of the events with just one click. It has never been easier to administrate your reservations than it is now.

Application features in OpenStage device

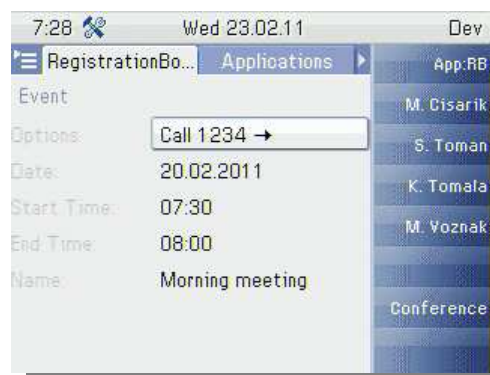

With our application, picking a free boardroom for your meeting is always easy and quick. Simply select the time of the event and let the application do the search for you.

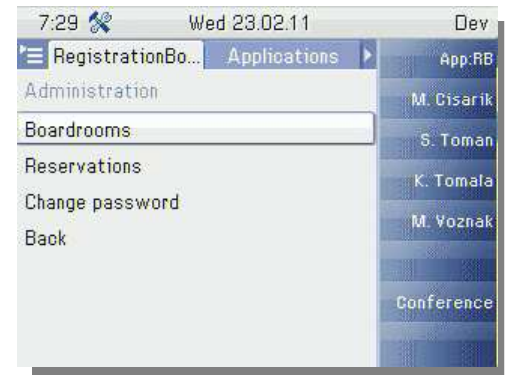

Do you want to know what is going on in a chosen boardroom? Just choose an overview in our application and take a look at all the events that will take the place there.

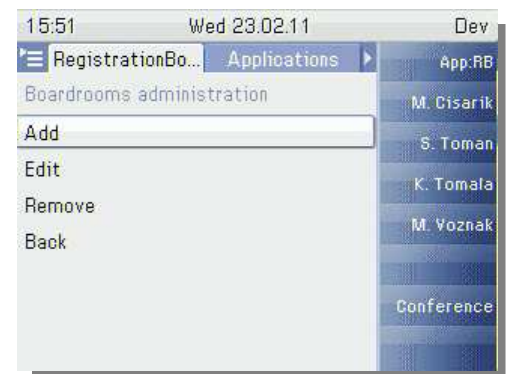

Display all details about any event you want to see so you stay up and informed in any case. Would you like to join that event? Give a call to event creator and let them know in one simple click.

As easy as creating a reservation you can also remove or edit all the events. In administration menu you can make all the modifications.

Add, edit or remove any of the rooms or reservations in the application. It wouldn't be smart if anyone could do that to your reservations would it? So a separate administrator account is here in your service, to give only an administrator the permissions.

As simple as that, all that you need to book a room for the meeting is right at your hand in your telephone. Do you say you can't get to your OpenStage? No problem at all ...

Functionality
Full reservation
administration and
overview

Usability
Intuitive interface

MySQL database engine

Performance
Speed optimized code

Supportability
Customizable open
source solution

Supported devices
OpenStage 60 (SIP/HFA)
OpenStage 80 (SIP/HFA)

Application features in web browser

You can use all the application features through any available web browser, just as easy as browsing a web page. Creating, editing or removing reservations, all covered in clean design and ready to be used anytime.

The 'New Event' form contains the following fields:

- Name: Code review
- Date: 25.02.2011
- Start Time: 12:00
- End Time: 13:00

A 'Find free rooms' button is located at the bottom of the form.

Choose a time and date of your event and pick a free place. Take one of your previously created reservations and edit any detail or remove it.

Pick a room you want and take a look at the schedule. An overview table shows every detail you need to know for a day, week or a month. Slide through the weeks, months using arrows with speed and no delays.

Because we have been thinking about needs of anybody using the overview table, we made it customizable, so you can choose all the specific display settings as step size in minutes, start hour, end hour or even a time format or time zone. A list of all your previous reservations with details appears under, so you don't need to keep the dates in mind.

The interface shows a calendar for room A1010 from 21.02.2011 to 27.02.2011. Reservations are shown as blue blocks:

- 21.02.2011 (Mon): Peter - 4700 Meeting (12:00-14:30)
- 23.02.2011 (Wed): Peter - 4700 Code review (12:00-13:30)
- 24.02.2011 (Thu): Pavel - 4711 Meeting (12:00-13:30)
- 24.02.2011 (Thu): Pavel - 4711 Meeting (15:00-16:00)

Below the calendar is a table of reservations:

Event Name	Start	End		
Meeting	24.02.2011 12:00	24.02.2011 14:00		
Meeting	24.02.2011 15:00	24.02.2011 16:00		

Separate administrator account allows you to list reservations of all the users and edit or remove them as you wish. Administrate all the rooms in the system, add, edit, remove, as well as the user accounts and all the

The 'Settings' form includes the following options:

- Timezone: Etc/GMT+1
- Start Hour: 10
- End Hour: 16
- Step (Minutes): 30
- First day of a Week: Monday
- Show Weekend:
- AM/PM:

A 'Save' button is located at the bottom of the form.

changes are immediately visible to the users, whether it is an OpenStage telephone at the desk they are using, or their favorite web browser.

Simply put, with our OpenStage Registration BoardRoom application you will never need to worry, where would your next meeting take place.
